Advantages

- ✓ Modular construction with concealed hinges contribute not only to ergonomics but also to the robustness of the letterbox system.
- ✓ No welding processes, as a measure for high resistance to corrosion and long-lasting use of the letterbox system.
- ✓ Various numbering options.

Robust and elegant Standard Volume

Vertical, space-saving letterboxes. With an elegant simple design and a large choice of finishes, our model 2040 is the solution for equipping your lobby with high quality letterboxes with minimum projection from the wall. Ideal for narrow corridors.

To adapt to the number of occupants and your architectural constraints, the 2040 series is available in different configurations suitable for indoor or outdoor use.
