

# Model 2025-1

**15 Years**  
Warranties Corrosion Resistance

## Mailbox system for integration into communal door frames

### Standard volume

Front panels can be designed in any size and with different insulation thickness depending on the structural requirements.

## Advantages

- ✓ Modular construction with concealed hinges contribute not only to ergonomics but also to the robustness of the letterbox system.
- ✓ No welding processes, as a measure for high resistance to corrosion and long-lasting use of the letterbox system
- ✓ Various numbering options.

## Technical description

Letterboxes comply with European and British Standards **BS EN13724**.
