

# Model 2600-2

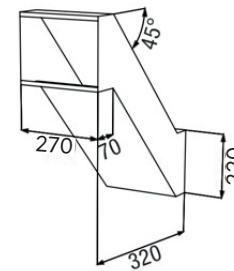

## Mailbox system for integration into communal door frames Large volume

Front panels can be designed in any size and with different insulation thickness depending on the structural requirements. Sloping design provides better protection against mail theft attempts

## Technical description

Letterboxes comply with European and British Standards **BS EN13724**.

- Secured By Design compliant.
- Laser-cut aluminium front panel
- Ready for installation in door frame profile.
- Boxes made of electro-galvanised sheet steel.
- Door made of 1 mm electro-galvanised steel.
- Invisible stainless steel hinges.
- Integrated plastic nameplate holder.
- Standard flap with noise reduction device
- Mail removal protection.
- Powder coated in RAL 100 % polyester.
- Secured cylinder lock with two numbered keys.
- Volume suitable for A4 mail.

## Advantages

- ✓ Modular construction with concealed hinges contribute not only to ergonomics but also to the robustness of the letterbox system.
- ✓ No welding processes, as a measure for high resistance to corrosion and long-lasting use of the letterbox system.
- ✓ Various numbering options.
